

# Environmental Policy

Ampelmann provides safe offshore access to its clients. The management team are committed to the Environmental Policy, by personal involvement in its creation and commitment of appropriate resources for its implementation. Staff will be appropriately trained and informed of the personal and business benefits of effective environmental management.

We will provide the resources, consistent with operating a safe, efficient and commercially sustainable business, to enable all employees to be committed to:

- complying with applicable environmental procedures, regulatory and statutory obligations, and encouraging a culture of exceeding the level of minimum compliance, where appropriate.
- protection and conservation of assets, including property and the environment in a commercially sustainable manner.
- continually seek to improve our environmental performance by setting environmental objectives.
- manage our environmental impact by systematically identifying environmental hazards and processes, the risks they present and then establishing methods to control or eliminate them.
- reduce pollution, emissions and waste, and reuse or recycle as much as is possible.
- considering the life cycle of our systems and designing them to be as sustainable as possible.
- integrate the consideration of environmental concerns and impacts into our decision making and activities,
- train, educate and inform our employees about environmental issues that may affect their work,
- promote environmental awareness among our employees and encourage them to work in an environmentally responsible manner,
- communicate our environmental commitment to our clients and encourage their support.

This Policy will be reviewed on a regular basis to ensure that it is appropriately implemented and continues to improve our environmental performance.

  
Jan van der Tempel
