

Year-round offshore access in remote, extreme cold conditions

The N-type Icemann is the proven system that lets you transfer personnel safely in extreme cold weather. It is fully operational in temperatures as low as -28°C , sea states up to 3.5m Hs, ice and snow. Because of its full motion compensation, there is no movement in the gangway during operation, resulting in the safest and most comfortable way of people transfer.

AMPELMANN

N-type

Full operational ability in extreme cold weather

In temperatures as low as -28°C

Covered transfer deck, gangway and operator cabin

Keeping all your personnel protected from the harsh weather
