

# A

### **The offshore access solution with an unparalleled track record**

The A-type is the offshore access system you need if you want to perform safe personnel transfers in sea states up to 3m H<sub>s</sub>. Because of its full motion compensation, there is no movement in the gangway during operation, resulting in the safest and most comfortable way of people transfer. The A-type can transfer 20 people in under five minutes from a vessel to a fixed or floating object.

A system that is safe, proven and efficient.

# AMPELMANN

# A-type
